

Generation Rx: Safe Medication Practices for Life Drug Abuse Prevention Training for our Community

More than

**6 MILLION
AMERICANS**

age 12 and older have used a prescription drug nonmedically in the past month.

**DRUG
OVERDOSE**

is the leading cause of accidental death in the United States.

Approximately

**5,500
AMERICANS**

misuse a prescription medication for the first time every day.

The **mission of Generation Rx** is to educate people of all ages about safe medication practices. Prescription medications can help us live longer and healthier lives, but any medication has the potential to do harm – especially when misused.

During this training: Learn how to utilize the FREE educational tools on the Generation RX website to help you teach about safe medication practices.

Who Should Attend? Anyone can use the tool kit to present the educational materials to children, teens, college students, adults, seniors, patients, and the workplace.

This program is funded through a mini-grant provided by Ohio State University College of Pharmacy and Cardinal Health.
